

# Acknowledgements of the Euclid Consortium

## (v1.0, 26SEP2025)

The Euclid Consortium (EC) is a joint collaboration of about 2000 scientists, from more than 350 institutions, universities or research laboratories, most scientists working in the 18 contributing countries funding the consortium: Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hungary, Italy, Japan, the Netherlands, Norway, Portugal, Romania, Spain, Switzerland, United Kingdom, United States of America. Several key staff members of the European Space Agency (ESA) or from the main industrial contractors of Euclid, are also members of the EC, as well as individual scientists from 20 other countries or international organizations. The complete list of affiliations of EC members who contributed to Euclid between 2006 and 2025 is available below. The list also contains a few other institutes that contribute to Euclid, though never hosted staff members registered as EC members.

The Euclid Consortium acknowledges ESA, the Euclid industrial main contractors, Thales Alenia Space (TAS) and Airbus Defence and Space (ADS), and the national space agencies and research institutes that have supported and support the development, commissioning and operation phases of the Euclid satellite, and the production, delivery, distribution and scientific exploitation of the Euclid mission data products, in particular the

- Agenzia Spaziale Italiana (ASI), the Istituto Nazionale AstroFisica (INAF), the Instituto Nazionale de Fisica Nuclear (INFN),
- Austrian Forschungsförderungsgesellschaft (FFG) funded through the Bundesministerium für Innovation, Mobilität und Infrastruktur (BMIMI),
- Belgian Science Policy,
- Canadian Euclid Consortium,
- German Deutsches Zentrum für Luft- und Raumfahrt (DLR), the Max-Planck-Institute for Astronomy (MPIA), the Max-Planck-Institute for Extraterrestrial Physics (MPE), University of Bonn, and Ludwig-Maximilians-University Munich.
- Technical University of Denmark, DTU Space and Copenhagen University, the Niels Bohr Institute (NBI),
- French Centre National d'Études Spatiales (CNES), the Institut National des Sciences de l'Univers (INSU) and the Institut National de Physique Nucléaire et de Physique des Particules (IN2P3) of the Centre National de la Recherche Scientifique (CNRS), and the Institut National des lois Fondamentales de l'Univers (IRFU) of the Commissariat à l'Énergie Atomique et aux Énergies Alternatives (CEA),
- Hungarian Academy of Sciences,
- National Aeronautics and Space Administration (NASA),
- National Astronomical Observatory of Japan (NAOJ) and Japanese Euclid Consortium (JEC),
- Nederlandse Onderzoekschool Voor Astronomie (NOVA),
- Norwegian Space Agency and the Research Council of Norway,
- Portuguese Agência Espacial Portuguesa, Fundação para a Ciência e a Tecnologia (FCT),
- Research Council of Finland,
- Romanian Space Agency (ROSA),

- Spanish Ministerio de Ciencia, Innovación y Universidades (MCIU/AEI/10.13039/501100011033),
- State Secretariat for Education, Research, and Innovation (SERI) at the Swiss Space Office (SSO), Swiss National Science Foundation, and
- The United Kingdom Space Agency (UKSA), and the Science and Technology Facilities Council (STFC).

The Euclid data releases are based on observations obtained with the ESA Euclid satellite visible VIS and near infrared NISP instruments, and with complementary imaging, photometric and spectroscopic data obtained with ground-based telescopes.

In the northern hemisphere, the complementary observations are from the Ultraviolet Near Infrared Optical Northern Survey (UNIONS, <https://www.skysurvey.cc/>), a scientific collaboration using three Hawai‘i-based telescopes: the Canada-France-Hawai‘i Telescope (CFHT, funded by the Centre National de la Recherche Scientifique (CNRS, France), the National Research Council of Canada (NRC) and the University of Hawai‘i), the Pan-STARRS telescopes (operated by the Hawaiian Institute for Astronomy Advanced Technology Research Center), and the Subaru telescope (operated by the National Astronomical Observatory of Japan, NAOJ). We are honoured and grateful for the opportunity of observing the Universe from Maunakea and Haleakalā, two mountains of considerable cultural, historical and natural significance and sacred for the Kānaka ‘Ōiwi people, the native people of Hawai‘i.

In the southern hemisphere the complementary ground-based observations are obtained with data from the Dark Energy Survey (DES, <https://www.darkenergysurvey.org/> ), using the Blanco 4-meter telescope at Cerro Tololo Inter-American Observatory (CTIO), in Chile.

Complementary observations for the Euclid Deep Field-North and Euclid Deep Field-Fornax are from the Hawai‘i Two-0 Survey (H20, <https://project.ifa.hawaii.edu/h20> ), an effort using three Hawai‘i -based telescopes: CFHT, Subaru, and Keck (operated as a scientific partnership among the California Institute of Technology, the University of California, and the National Aeronautics and Space Administration, made possible by the generous financial support of the W. M. Keck Foundation).

Complementary Euclid-specific spectroscopic observation campaigns, to calibrate photometric redshifts down to Euclid depth, were obtained from the Large Programme "*Euclid Photometric Redshift Calibration*" on the European Southern Observatory Very Large Telescope (ESO VLT), in Chile, and on the Keck Observatory telescope, Hawai‘i, as part of the Key Strategic Mission Support programme, to extend the Complete Calibration of the Color-Redshift Relation survey (C3R2) spectroscopic survey.

All published EC SGS data products are astrometry-calibrated using the ESA mission Gaia, whose data are being processed by the Gaia Data Processing and Analysis Consortium <https://www.cosmos.esa.int/gaia> .

The Euclid cosmological Flagship Simulations (EFS) have been carried out thanks to the support of the PartneRship for Advanced Computing in Europe (PRACE) project "*Simulating the Euclid Universe*", using the Piz Daint supercomputer at the Swiss National Supercomputing Centre (CSCS) and the Spanish Euclid Science Data Center computing resources. The EFS catalogue has been developed by an international team, led by the Institute of Space Sciences (ICE-CSIC) and the Port d'Informació Científica (PIC), operated through a collaboration

agreement between Research Centre for Energy, Environment and Technology (CIEMAT) and the Institut d'Astrofísica d'Altes Energies (IFAE), the University of Zurich, INAF, CEA, the University College London (UCL) and the Institut d'Astrophysique de Paris (IAP).

The cosmological forecasts of the Euclid core cosmology programme were carried out using the High-Performance Computing (HPC) and storage resources of the EuroHPC Joint Undertaking (EuroPHC JU) facilities, providing access to the MeluXina supercomputer at LuxProvide, Luxembourg, the Spanish MareNostrum5 (MN5) of the Barcelona Supercomputer Center (BSC), the Baobab and Yggdrasil HPC service of University of Geneva, the Dutch Snellius Computing Cluster at SURFsara, the Academic Leiden Inter-disciplinary Cluster Environment (ALICE) of Leiden University and the Xmaris cluster of the Lorentz Institute of Theoretical Physics in Leiden, the computing center MesoPSL of Observatoire de Paris-PSL, the Feynman cluster of IRFU at CEA Paris-Saclay, the Centre d'Informatique National de l'Enseignement Supérieur (CINES), using the Grand Équipement National de Calcul Intensif (GENCI), the UK Science and Technology Facility Council (STFC) e-Infrastructure for Research and Innovation for STFC (IRIS) and DiRAC computing facilities, the CSC - IT Center for Science (Finland), and the German Rheinisch-Westfälische Technische Hochschule (RWTH) of Aachen University.

## **List of affiliations of EC members (Sep 2025), EC funding countries are in bold:**

### **Australia (AU)**

- . The University of Melbourne, School of Physics
- . University of Sydney, School of Physics
- . University of Western Australia, International Center for Radio Astronomy Research

### **Austria (AT)**

- . Institute of Science and Technology Austria
- . Österreichischer Wissenschaftsfonds FWF (Austrian Science Fund)
- . Universität Wien, Institut für Astrophysik
- . Universität Innsbruck, Institut für Astro- und Teilchenphysik

### **Belgium (BE)**

- . Belgian Federal Science Policy Office, Space Science and Applications Division
- . Centre Spatial de Liège
- . Université catholique de Louvain, Centre for Cosmology, Particle Physics and Phenomenology
- . Université de Liège, Institut d'Astrophysique et de Géophysique
- . Université de Namur
- . Universiteit Gent, Vakgroep Natuurkunde en Sterrenkunde
- . Université Libre de Bruxelles
- . Vrije Universiteit Brussel, Physics Department of Astronomy and Astrophysics

### **Brazil (BR)**

- . Universidade de São Paulo, Instituto Astronomia, Geofísica e Ciências Atmosféricas

### **Canada (CA)**

- . Canadian Space Agency
- . Dalhousie University, Department of Physics and Atmospheric Science
- . Herzberg Institute of Astrophysics
- . McGill University, Department of Earth and Planetary Sciences

- . McMaster University, Department of Physics and Astronomy
  - . National Research Council Canada
  - . Perimeter Institute for Theoretical Astrophysics
  - . Royal Military College of Canada, Department of Physics
  - . Saint Mary's University, Department of Astronomy and Physics
  - . Université de Montréal, Département de Physique
  - . University of British Columbia, Department of Physics and Astronomy
  - . University of Manitoba
  - . University of Toronto
  - . University of Victoria, Department of Physics and Astronomy
  - . University of Waterloo, Department of Physics and Astronomy
  - . University of Winnipeg
  - . York University
- CERN (CERN)**
- . European Organization for Nuclear Research
- Chile (CL)**
- . Universidad de Chile, Departamento de Física, Santiago
- China (CN)**
- . Shanghai Jiao Tong University, Department of Astronomy, School of Physics and Astronomy
  - . Tsinghua University, Department of Physics
- Cyprus (CY)**
- . University of Cyprus, Department of Physics
- Czech Republic (CZ)**
- . Astronomický ústav AV ČR, Ondřejov
  - . Charles University, Faculty of Mathematics and Physics
  - . Fyzikální Ústav, Institute of Physics of the Czech Academy of Sciences
- Denmark (DK)**
- . Aarhus University
  - . Technical University of Denmark, DTU Space
  - . University of Copenhagen, Niels Bohr Institute
- ESA (ESA)**
- . European Space Agency
  - . European Space Agency Headquarters
  - . European Space Astronomy Centre
  - . European Space Operation Centre
- ESO (ESO)**
- . European Southern Observatory
- Finland (FI)**
- . Aalto University, Department of Computer Science
  - . CSC - IT Center for Science
  - . Helsinki Institute of Physics (HIP)
  - . University of Helsinki, Department of Physics
  - . University of Jyväskylä, Department of Physics
  - . University of Oulu
  - . University of Turku
- France (FR)**
- . CEA Institut de Physique Théorique
  - . CEA IRFU Département d'Astrophysique (DAp)
  - . CEA IRFU Service d'Astrophysique (DAp)
  - . CEA IRFU Service d'Électronique des DéTECTeurs et d'Informatique
  - . CEA IRFU Service de Physique des Particules
  - . CEA IRFU Service d'Ingénierie des Systèmes
  - . Centre de Calcul de l'IN2P3/CNRS
  - . Centre de Physique des Particules de Marseille
  - . Centre de Physique Théorique
  - . Centre de Recherche Astrophysique de Lyon
  - . Centre de Recherche en Informatique, Signal et Automatique de Lille
  - . Centre National d'Études Spatiales, Paris

- . Centre National d'Études Spatiales, Toulouse
- . École Normale Supérieure
- . Institut National de Physique Nucléaire et de Physique des Particules
- . Institut d'Astrophysique de Paris
- . Institut d'Astrophysique Spatiale
- . Institut de Mécanique Céleste et de Calcul des Éphémérides
- . Institut de physique des 2 infinis de Lyon
- . Institut de Planétologie et Astrophysique de Grenoble
- . Institut de Recherche en Astrophysique et Planétologie
- . Institut de Recherche en Informatique Toulouse
- . Institut National des Sciences de l'Univers
- . International Space University
- . Junia, Université Catholique de Lille
- . Laboratoire AIM CEA IRFU Service d'Astrophysique
- . Laboratoire AstroParticule et Cosmologie
- . Laboratoire d'Annecy-le-Vieux de Physique Théorique
- . Laboratoire d'Astrophysique de Marseille
- . Laboratoire de l'Accélérateur Linéaire
- . Laboratoire de Physique des 2 Infinis Irène Joliot-Curie
- . Laboratoire de Physique Nucléaire et de Hautes Énergies
- . Laboratoire de Physique Subatomique et de Cosmologie
- . Laboratoire des Matériaux Avancés
- . Laboratoire des Sciences des Procédés et des Matériaux
- . Laboratoire des Signaux et Systèmes - Supélec
- . Laboratoire d'Études Spatiales et d'Instrumentation en Astrophysique
- . Laboratoire GREYC CNRS-ENSI Caen
- . Laboratoire d'Informatique et des Systèmes
- . Laboratoire d'Instrumentation et de Recherche en Astrophysique
- . Laboratoire Kastler Brossel, École Normale Supérieure
- . Laboratoire Univers et Particules de Montpellier, Université de Montpellier
- . Observatoire Astronomique de Strasbourg
- . Observatoire de Besançon
- . Observatoire de la Côte d'Azur, Laboratoire Lagrange
- . Observatoire de Paris, site de Meudon, Laboratoire Galaxies, Etoiles, Physique et Instrumentation
- . Observatoire de Paris, site de Meudon, Laboratoire Univers et Theory
- . Observatoire de Paris, site de Paris, Laboratoire d'Études du Rayonnement et de la Matière en Astrophysique et Atmosphères
- . Observatoire de Paris-PSL, Laboratoire d'étude de l'Univers et des phénomènes eXtrêmes
- . Observatoire de Paris-PSL, Laboratoire d'Instrumentation et de Recherche en Astrophysique
- . Observatoire de Paris-PSL, Unité d'Ingénierie et de Développements Instrumentaux pour l'Astrophysique
- . Sorbonne Université, Paris
- . Université Bretagne Sud, Laboratoire IRISA
- . Université de Bordeaux, Laboratoire d'Astrophysique de Bordeaux
- . Université Côte d'Azur
- . Université Paris-Saclay
- . Université Paris Sciences et Lettres
